

Carboxytherapy Facial Includes

CLINICARE Concentrated Cleansing Foam with botanical extracts to gently remove impurities, unnecessary sebum and make-up, leaves skin soft and product free

CLINICCARE Instant Painless Peel, an enzymatic peeling gel that gently exfoliates to unclog blocked pores and remove the top layer of dead skin cells

CLINICARE Non-Invasive Carboxytherapy Gel and CLINICCARE Carboxytherapy Activator Face Mask firmly pressed on top of the gel and left on for about 20-30 minutes. This generates carbon dioxide that is infused into the skin to encourage an increased flow of oxygen. The body responds by increasing blood flow and growth factors, which encourages an increase in capillary activity. This provides a surge of oxygen and nutrients to the treated area and improves circulation, resulting in cell restoration, a reduction in fine lines and wrinkles and collagen stimulation

CLINICARE Skin Toner which contains a very high concentration of low molecular weight Hyaluronic Acid, to deeply hydrate and plump the skin

CLINICCARE Lip & Eye Renewal Cream which helps reverse the multiple signs of ageing around these two delicate areas. Low molecular weight Hyaluronic acid together with Squalene optimises hydration, minimises sensitivity, increases elasticity, and protects against environmental damage

CLINICARE Sun Shield Cream SPF30 which provides effective all day protection against harmful UVA and UVB rays, thanks to its 18 hour formula. Added botanical extracts nourish and moisturise the skin.

Includes chest, shoulder, neck, hand and arm massage.
